

Protecting Our Patients & Staff from Airborne Transmission of Viruses, Including Coronavirus

WellAir's Novaerus air dis-infection technology has been independently tested to reduce MS2 Bacteriophage, a commonly used surrogate for SARS-CoV-2 (COVID-19) by **99.99%**.

Killing Airborne Viruses 24/7

WellAir's Novaerus portable air dis-infection units safely reduce infection by destroying pathogens in the air with our patented plasma technology.
